

Leg Strengthening Exercises

This exercise program has been designed for you by your physical therapist. Do only the exercises marked. Do them slowly and smoothly on a firm surface. Never hold your breath while doing your exercises, as it may cause your blood pressure to rise. If you feel any pain or discomfort, tell your therapist. It is your responsibility to follow this program.

6. Bend both knees and keep your feet flat on the mat, bed, or floor. Keep one leg in place and slowly lower your other leg out to the side. Bring your leg back to the center.

7. Lie with both legs straight. Slide your leg out to the side and return it to the center. Keep your knees straight and toes pointing up during the exercise.

8. Keep your legs in the same position as #7. Do this exercise in 5 steps:

- Lift both of your legs straight up keeping your knees straight.
- Spread your legs out to a V.
- Put your feet together to make a diamond shape
- Put your knees together.
- Return your legs to the starting position.

9. Lift your leg, bending it at your hip and knee. Bring your knee toward your chest. Return to starting position.
